- C.htm

September 19, 2001

Dear Sir or Madam,

I am writing to offer my strong support for the development of the Yucca Mountain site as a repository for nuclear waste.

Commitment to a sensible nuclear waste disposal strategy is vital to the nation's ability to fight air pollution, produce electricity without unduly harming the environment and protecting the vital uses of isotopes in medicine and industry.

DOE's preliminary suitability report addresses adequately all important aspects of nuclear waste disposal potential at this site. I maintain that a solution for nuclear waste disposal need not be perfect, but rather soundly designed, monitorable, and based on the best science available to us. I understand our state of knowledge, and our solutions, will continue to improve.

Disposal of nuclear waste at Yucca Mountain deserves to advance to the next stage of review and development. I urge DOE Secretary Abraham to recommend a "Go."

Sincerely,

Ron M. Aryel MD MBA
